

► Technical English for Managers and Engineers

انگلیسی فنی مختص مدیران و مهندسين

4- day Intensive Workshop with Professor Dr.-Ing. N. Kanani

کارگاه آموزشی تمام وقت 4 روزه

Course ID: SM-208

Being able to communicate in English and to carry on conversations with different people about day-to-day matters is something, being capable of expressing and describing technical and scientific topics something else. For managers and engineers who are responsible for R&D and production of parts or are in charge of quality and performance of products it is vital to be able to fully understand and correctly speak technical English.

Goals

- This intensive course aims at providing the participants with sufficient knowledge of Technical English commonly used in different fields of science and technology.

Program Overview

Discussion about expectations and goals of the course

Introductory remarks

The nature and purpose of Technical English

Participants introduce themselves and tell each other about their educational achievements, technical and scientific background

What is generally needed in terms of Technical English

- Analysis and discussion of working knowledge
- Tips and recommendations

Finding out how much Technical English the participants are familiar with

Technical subjects described by the participants based on their experiences

Outlining the most important technical and scientific fields for the participants

- Uncovering the real experiences of the participants
- Analysis from mutual perspectives
- Discussions

Characterizing the fields of interest through discussion and dialog

Establishing milestones

Trainer

Nasser Kanani (Dr.-Ing. Dr. habil.) is professor of Materials Science at the Technical University of Berlin (Berlin Institute of Technology) and Berlin University of Applied Sciences. He was involved in research work at MIT (Cambridge/Boston) and the University of Florida (Gainesville/Florida) during the eighties. Later on he was invited by the Zakarya University in Adapazari/Turkey to give lectures as a guest professor. His major fields of research and teaching are: solid states physics (properties of metals and alloys), surface technology (corrosion and corrosion control). He has authored 6 textbooks on different technical and scientific topics and published 200 scientific papers. In addition to his academic carrier he has been involved in industrial research for the last 25 years. N. Kanani has taught German students Technical English for some time.

Learning Techniques

Lectures, discussions, role plays, practice in talking again and again

The participants will be provided with technical texts for reading and discussing as well as diagrams, tables, and illustrations to be described and analysed by them.

Trainer's email address: nasser@kanani.info
